Summary

Motivated BTech CSE student with hands-on experience building responsive web applications using HTML, CSS, and vanilla JavaScript. Developed three projects (attendance management, banking, and expense tracking) featuring CRUD operations, data persistence, analytics dashboards, and custom-built charts. Strong foundation in Python, Java, and C++, complemented by communication and public-speaking skills from anchoring technical events. Seeking an internship to apply my skills and grow as a software developer.

Work Experience

Jan 1970 - Present

Education

10th

Bohra PUB School

2021- 2022

12th

Bohra Pub School

2023- 2024

BTech CSE

NGF College of Engineering and Technology

- 2029

Projects

Attendance Management System

Project Link

Built a responsive attendance management web app in vanilla JavaScript with student CRUD, subject-wise attendance marking, live dashboard analytics, filterable records, CSV export, and printable student reports.

Banking System

Project Link

Built a responsive banking web app in vanilla JavaScript with account creation, PIN login, deposits, withdrawals, fund transfers, transaction history, and a live dashboard, using LocalStorage for persistence.

Personal Expense Tracker

Project Link

Built a responsive expense tracker in vanilla JavaScript with expense CRUD, search and filters, monthly and category analytics using custom-built charts, CSV export, and a persistent dark mode.

Achievements

Won 2nd Prize in Speech Competition

Anchoring in Technical Quiz Competition and in Fresher's Party

Engaged large audiences while anchoring," with no capital letters mid-sentence

Skills

- Python
- Java
- C++
- C
- HTML
- CSS
- JS
